Dear Recruiter,

My name is Sulaiman Qazi, and I am eager to join the STEAM project as a Summer Camp Counselor. This is an exciting opportunity given my extensive experience working with children, specifically teaching them coding and STEM subjects.

For over 2 years now, I have been guiding and mentoring children in my community through my multiple volunteering experiences. I have a strong grasp on how to engage with children by consistently encouraging a positive and supportive learning environment. As a Coding Tutor and a previous Town of Ajax Summer Camp volunteer, I am very comfortable educating children while having fun. Furthermore, I am highly proficient in robotics and coding. As a member of our school's VEX Robotics Team, I have worked with our team to develop a robot that has competed and achieved success at competitions. My passion for STEM and coding extends beyond school, as I have taken on many personal projects to develop my skills. I have developed 3D designs of molecular cells, and created an ambient lighting system for my TV using a Raspberry Pi and Arduino, as well as other breadboarding projects.

My demonstrated passion for mentoring children and continued fascination with technology makes me an ideal candidate for the Summer Camp Counselor role. Thank you and I look forward to speaking soon.

Sincerely,

*Sulaiman Qazi*
